Our services are a unique combination of user-friendly design and strong internet marketing plans. We strive to build a web site that pays for itself. We design it with your major goals in mind from, programming, copywriting and graphic design to complete development of your website.

1.1 Corporate Website

In today's world internet is the backbone of the society. Any company cannot survive in the market without website. Corporate website differs from individual website. Corporate website has played a crucial role in the rise of the performance of company. Corporate websites need some special features like logo development, e-commerce solutions, and database development etc.

Every webmaster has a desire that his website should be unique and eye-catching

Website designing of corporate website is a costly, lengthy, and tough process. Without experience and qualified team you can't create a quality corporate website. This includes Website designer, website developer, software developer,

programmer and content developer. We develop exceptional, innovative, and high quality corporate website for our clients at affordable prices.

1.2 Content Managed Website

A content management system (CMS) is the collection of procedures used to manage work flow in a collaborative environment.

Content management system (CMS) can be defined as a system used to organize and create documents and other content. In terms of web applications a CMS is used for managing websites and web content which in many cases requires a backend system for editing and creating documents.

1.3 E-Commerce Website

E-commerce is also known as electronic commerce. It's used to buy or sell products through online. As the number of people purchasing through internet is increasing day by day, e commerce web design and development is increasingly important for any business aiming to be successful on internet. We offer our clients with the promotional services of e commerce web sites so that they can make their online business more profitable. Every online business promotes its goods to their customers via ecommerce only. In this fast running world, ecommerce has made the customers to feel comfortable while purchasing their desired product through online. It helps you to buy or sell a product immediately in a secured manner.

Even when you analyze on your own, you will find this system to be the best and comfortable. Extravis Technologies provide best ecommerce solutions. Do you have ideas of promoting or buying any product through ecommerce solutions, and then we can do that for you in a profitable manner.

1.4 Website Redesign

Normally website redesigning is done to improve or update a site with latest information and offers without which a site's rank can be brought down. Only be

redesigning a site, you can expect the businesses (those which are linked to that respective website) to run successfully.

Extravis Technologies is expert in website redesign. We provide best service on affordable rate. If you are looking for website redesign contacts us with our hesitation.

1.5 Logo & Graphic Design

Your business logo design is going to be the stamp or the face by which the market would remember your business. A gist on what your company does should be contained in your logo rather than just your initials or your picture which does not just have any importance.

We are expert in **Logo design** and **Banner design**. Logo design is the most difficult part of graphic design. We design meaningful logos and our banners are attractive. Our designers at Extravis Technologies would design a scintillating new logo/brochure for your company.

1.6 Website Maintenance

Maintenance is a tool which extends an asset's life. Website maintenance is essential process to improve the website's performance. In this process we update our website on regular basis. We upload content related to new updates and delete outdated and unnecessary content. Website maintenance is also importance for security reasons.

The website maintenance close security holes, to address problems caused by a hacker, and for other reasons related to security.
