+965-99983112

Having more than ten years of experience in commercial projects, oil & gas projects, construction management, solving engineering issues, dealing with project sourcing and supply chain, sales & procurement, and clients & stakeholders management. Looking to work for a progressive organization, a challenging opportunity where I can utilize my education and professional experience to develop a growth-oriented career.

Work Experience

Lead Construction Engineer

Schlumberger - (between Muscat, Kuwait and UAE)

October 2016 to Present

In my last Project, I had:

- Managed the construction and completion of an Early production facility in Oman within five months (Fast track project)
- Supervised team of 20-50 staff members
- Quality Control Identified and moved empty and broken pallets to proper areas Adhered to quality control procedures and documented quality checks
- Reporting Responsible for daily reporting on production equipment, including parts produced, downtime minutes, and any quality concerns
- Process Improvement Implemented productivity improvement plan which resulted in company savings of over \$60 K all over the project period
