SUMMARY

Experienced Full Stack Developer with 6 years of experience specializing in React, React Native, Next.js, TypeScript, Node.js, and MongoDB. Expert in creating exceptional user interfaces and robust backend systems, and skilled in leading projects from start to finish ensuring clean code and adherence to best practices.

EXPERIENCE

Full Stack Engineer

LocalPoint   **October 2023 - Present, Switzerland**

· Implemented a custom project management app tailored to the team's needs using React, increasing project tracking efficiency by 50%.
· Integrated third-party analytics APIs such as Google Analytics into the in-house content management system using PHP, along with building data visualization dashboards and reports using React and Recharts, providing actionable insights and improving website performance tracking by 40%.
· Performed code reviews and wrote detailed documentation and user guides.

Lead Full Stack Developer

Study Abroad Global   **March 2022 - September 2023, Algeria**

· Developed and launched a university courses search application, facilitating students' search for university programs using Next.js, React, Node.js, MongoDB, and MongoDB Atlas, achieving a 35% increase in student engagement and a 20% increase in leads within 6 months.
· Optimized database queries in MongoDB and search queries in MongoDB Atlas, improving data retrieval speeds by 50%, leading to a 20% boost in overall application performance.
· Built and maintained the company's website and blog using Next.js and Prismic CMS, implementing responsive design and SEO optimizations, which led to a 50% increase in organic traffic within six months.
· Executed automated testing and continuous integration pipelines, reducing deployment times by 30%.
· Mentored junior developers on best practices in Next.js, React, and Node.js, contributing to improved team productivity.

Full Stack Developer

Switch Food   **January 2020 - February 2022, Algeria**

· Developed comprehensive food delivery apps for clients, delivery personnel, and restaurants using React Native, Node.js, and MongoDB.
· Implemented real-time tracking features, enhancing customer satisfaction and resulting in a 15% growth in user retention.
· Built a management dashboard using React with functionalities for invoicing and push campaigns, improving operational efficiency by 35% and increasing customer engagement by 25%.
· Integrated third-party APIs for payment gateways, mapping services, and notification systems, providing a feature-rich user experience.
· Conducted rigorous testing and debugging, ensuring a smooth user experience across all platforms.
· Continuously deploy updates and new features, maintaining a 99.9% uptime and ensuring continuous availability for users.

Front End Developer

GPS City   **May 2019 - December 2019, Algeria**

· Designed and shipped a new responsive user interface for a fleet management system using React, improving user accessibility across devices and increasing user engagement by 30%.
· Generated data visualization dashboards for real-time insights into fleet performance, reducing data analysis time by 25%.
· Conducted thorough user testing and incorporated feedback, leading to a 20% improvement in usability.
· Collaborated with backend developers to ensure seamless integration and data flow.

EDUCATION

Master's Degree in Electronics of Embedded Systems

Ferhat Abbas Setif University · Algeria · 2018

SKILLS

HTML, CSS, JavaScript, TypeScript, Node.js, Express.js, PHP, React, React Native, Next.js, Bootstrap, MongoDB, PostgreSQL, Jest, Playwright, Git, GCP, DigitalOcean, Nginx
