An array of Revenue Cycle Management solutions to hospitals, home healthcare companies and physician practices, so that they can focus on what they do best, which is providing state of the art patient care.One of the most comprehensive Revenue Cycle Management solutions in the industry at one of the best value proposition.Revenue Cycle process which starts well before the patient has set his/her foot in the door and doesn't stop till every last dime has been collected.

TECHNICAL SKILLS

Python   Django   Html   MySql   Ms Office

PERSONAL PROJECTS

Home Automation Using ESP8266
(02/2019 - 04/2019)
- COLLEGE PROJECT : In this project we are going to make a home automation system using ESP8266 WiFi module and Arduino Uno. Using this we will be able to control lights, electric fan and other home appliances through a web browser using your PC or mobile. These AC mains appliances will be connected to relays which are controlled by the Arduino. ESP8266 and Arduino together acts as a Web Server and we will send control commands through a Application called Blynk. ESP8266 is the one of the most popular and low cost wifi module available in the market today. You can ready more about it here, ESP8266 – WiFi SoC.

CERTIFICATES

Full Stack Development in Python
(04/2019 - 07/2019)
