

# Walid Bousnina

FULL STACK JS DEVELOPER

## CONTACT

P +216 20606359

E bousnina.walid1@gmail.com

## EDUCATION

### NATIONAL DIPLOMA IN COMPUTER ENGINEERING

ESPRIT Tunisia

2013 - 2016

### NATIONAL APPLIED BACHELOR'S DEGREE

ISI Tunisia

2010 - 2013

## LANGUAGES

French: Bilingual

English: fluent

Arabic: Native

## PROFILE

Experienced Full Stack Developer. Skilled at all stages of the development cycle for dynamic web projects. Proficient in a variety of programming languages and frameworks, including HTML5, JavaScript, CSS, MySQL, Node.js, Angular. Strong project management experience

## EXPERIENCE

### Full Stack JS

WHONOX

2017 - present

- Full Stack JS
- Tech Lead

## SKILLS

Node.js

Nest.js

Angular

Ionic

React native

MongoDB

Mysql

# PROJECTS

## BRINCO

*Octobre 2022 - present*

- Creation of a mobile application that enables users to subscribe to predefined service plans, including emergency repair services. Subscribers can make online reservations for appointments with our technicians. Simultaneously, a web application was developed to manage the administration of the mobile application and to track subscribers and service interventions
- Technical Environment: Node.js, react native, Angular, MongoDB, Docker, Git, clickup

## JEEBY TECHNOLOGIES

*July 2022 - Aout 2022*

- Creation of a platform comprising a web and mobile application that allows registered partners to post Offers (Deals) that will be published to the application's customers. The application has 3 main roles: Admin, Provider, and Client
- Admin: A web space that allows for report consultation and dashboard management, managing providers and clients, managing services (Restaurant, Café, Beauty Salon, etc.), monitoring offers, and generating invoices.
- Provider: A web/mobile space that allows for offer management and order validation
- Client: A mobile space that allows for searching and booking published offers. Accomplishments
- Backend: Authentication, Search and filters (MongoDB Queries), CRUD, Booking system (QR Code Generation), Notifications, Generic code for offers (JSON schema).
- Frontend: Generic components to be used in multiple features (Configurable search table, Generic forms based on JSON schema), CRUD consumption.
- Technical Environment: Nest.js, Ionic, Angular, MongoDB, Docker, Git, JSON schema, clickup

## **P R O J E C T S**

### **PARITEL FRANCE**

*June 2020 - June 2022*

- Following the decision of Paritel France to migrate their services to a cloud platform (Microsoft Metaswitch) without changing their existing ecosystem (CRM, billing software, stock management, data warehouse...), our mission was to create bridges and events between the current ecosystem and our application, which acts as an intermediary between the present ecosystem and the new Metaswitch platform, by creating appropriate configurations for Metaswitch using the data received from the ecosystem.
- Technical environment: Nest.js, Angular, Electron.js, MongoDB, Docker, Git, JSON schema, Clickup, Jira

### **LIBRE TRANSPORT**

*December 2019 - April 2020*

- Libre is a private transportation startup that offers its customers (call centers, factories) transportation by taxi/bus. A web interface must be provided to the administration for managing drivers and assigning passengers. A web interface must also be provided to the client for managing employees enrolled in the transportation service. A mobile app is provided to drivers to notify them of assigned transportation rides.
- Technical Environment : Symfony, Nodejs, Socket.io, Web service REST, Angular 8, Git, Agile.

### **ARGOS GPS**

*January 2019 - October 2019*

- Argos is a B2B web-based GPS tracking application that allows its customers to track their fleet in real-time, view their navigation history, fuel consumption, and set up alerts such as theft and towing alerts.
- Technical Environment : MongoDB, Nodejs, Angular 8, Git, Agile

## **P R O J E C T S**

### **CRM PERMIS PROMOS TUNISIA**

*February 2018- October 2018*

- Permis Promo is an advertising company for a driver's education and license training service. The project is a CRM that allows the company to better manage their leads, candidates, course scheduling, instructor assignments, prospect, customer, and instructor lists, and schedule driving test appointments.
- Technical Environment : MongoDB, Symfony, Angular 7, Git, Agile

### **DREAMLIFE MLM**

*October 2017- July 2018*

- An e-commerce website with the capability to support a multi-level marketing (MLM) sales model.
- Environnement Technique : MongoDB, Symfony, Angular 7, Git, Agile.

### **FREELANCE**

*January 2017- June 2017*

- Web development using Content Management Systems (CMS).
- Technical Environment : Wordpress, PHP.
