KEY PROJECTS

BTECH :

2018

Estimation Planning And Earned Value Management Of A Multi Storey Building

The project aims to capture the progress of the work at various stages of construction. For this we start from the pre tendering stage. As per the tender documents received from the contractor, the pricing of entire bill items is done according to the prevailing rates. Then a detailed estimation report and planning schedule is prepared. This is followed by linking between planning and estimation. Then valuation is done at various stages of work with the estimated and planned reports and finally MIS report (Management Information System) is generated, which is done using CANDY software.

MTECH :

2020

Study Of Influence Of Emotional Intelligence On Occupational Health And Safety Performance Among Employees In A Petroleum Refinery

In this study, 4 key success factors of emotional intelligence and occupational health and safety were first derived from a critical review of the past literature. The emotional intelligent factors and occupational health and safety measures were found to vary with educational level and designation of employees whereas, age and experience showed no impact. A critical analysis of the opinions of petroleum industry professionals regarding the extent to which the key success factors of emotional intelligence affect occupational health and safety in petroleum industry were done using SPSS software. Identified that a strong relationship exists between the two variables.

LEADERSHIP/VOLUNTEERING

- Organizing Events – Have served in various posts such as branch captain in sports and arts festival at college and school. Served as arts club secretary of M E S H S S and conquered first in sub district school level competition.
