PROJECT

AUTOMATION OF MECHANICAL CHESS PLAYER –Self, Bangalore, Jan 2018 - Mar 2018

The main scope of this we can play a realistic chess game instead of using smart phones and pc visuals. It may also used to connect with your smart phones with some extra developing options into it. These base arrangements like bearing movements with the help of stepper motors and crank lifted by a servo motor is also to be used as a CNC bed movements. These arrangements are also used as a 3D printing machine
