SKILLS

- Software development
- Systems integration
- Global infrastructure management
- Microservices and integration APIs
- Agile Methodologies, Scrum, Kamban
- AWS and Azure DevOps platforms
- Technologies such as Spring Java, REST, JSON and SQL/NoSQL databases
- Knowledge of the Python programming language
- Technical team leadership
- ITIL
- Data structure/msg: XML; JSON; SOAP; REST
- SOA/EAI middleware: Red

INTRODUCTION

My name is Alberto Nevares, and I bring over 30 years of experience in IT, with 22 of those years dedicated to Tibco products. I have a proven track record in software development, systems integration, and global infrastructure management. Throughout my career, I have delivered solutions across various industries, ranging from logistics and mining to financial services.

Currently, I work as a backend developer in the financial sector, focusing on microservices and integration APIs. My responsibilities include using Agile methodologies, AWS and Azure DevOps platforms, as well as technologies such as Spring Java, REST, JSON, and SQL/NoSQL databases. I am passionate about creating scalable and efficient solutions that drive business success.

My professional journey began in 1993, developing and maintaining systems for railway planning, ports, mining, and logistics at Vale. In 2002, I specialized in system integrations on platforms such as SAP, Mainframe, Midrange, Automation, and B2B. In 2005, I was responsible for developing the first B2B railway dispatch case, recognized by a leading logistics magazine. In 2006, I gained international experience in Portugal, integrating financial systems at Banco Espírito Santo. Upon returning to Brazil in 2007, I participated in the INCO project, focusing on Tibco integration of Vale's global ERPs. By 2009, I took on global responsibility for the architecture, deployment, and support of Vale's Tibco integration platforms, managing operations in Brazil, Canada, Oman, and Indonesia. These experiences solidified my expertise in executing global projects, multicultural collaboration, and managing diverse infrastructures.

I am excited about the opportunity to bring my extensive experience and diverse technical skills to your team. With a solid foundation in legacy systems, modern technologies, and a resilient ability to adapt and learn, I am confident in my capacity to tackle challenges and contribute to innovative, high-impact projects.

Thank you for considering my application. I am available to discuss how my experience aligns with your team's goals.

PROFESSIONAL BACKGROUND

GFT Group - Back-end Developer III, Tibco Developer
01/2023 – Present

- Development of microservices and APIs as a Back-end Developer III in the financial sector.
- Utilization of Agile methodologies, AWS and Azure DevOps platforms, along with technologies such as Spring Java, REST, JSON, and SQL/NoSQL databases.
- Architect and developer of integrations between applications and APIs/microservices, Salesforce, and SQL Server using the Tibco platform.

DXC/HP Enterprise Services - Tibco/OpenShift/AMQ Team Leader, Tibco Infrastructure Architect and Support
11/2009 – 01/2022

- Led a multinational team managing and supporting an integration environment distributed across five data centers in four countries (Brazil, Canada, Indonesia, and Oman), with 105 servers, approximately 2,500 applications, over 3 million messages per hour, 18 B2B partners, 3 ERPs, and over 200 applications, as well as 2 disaster recovery sites.
- Managed support teams for incidents, service catalogs, and resolution of critical issues.
- Proposed improvements, created and updated documentation, and actively participated in client meetings.
- Planned and implemented projects, acted as a client consultant, and conducted disaster recovery testing.
- Designed infrastructure, planned migrations and upgrades, analyzed system behavior, and suggested optimizations.
- Conducted root cause analysis, assessed deployment impacts, and studied environmental behavior.
- Evaluated new products and provided performance and workload reports.

Accenture - Integration Analyst / SOA & Tibco Specialist
06/2008 – 11/2009

- Provided Tibco technical support for various integration projects.
- Conducted technical analysis, architecture, and design for most integration solutions.
- Assessed and evaluated integration BW packages from external vendors.
- Enhanced a robust and reliable Tibco environment.
- Coordinated the migration of 80 integrations to a new platform while maintaining productivity.
- Performed environmental behavior studies using tuning approaches.
- Conducted Tibco product POCs (Proof of Concepts).
Accenture - Integration Analyst / SOA Specialist
06/2007 – 10/2008
- Developed integration between a Brazilian Oracle Enterprise Business Suite (ERP OEBS) and Canada-based Ellipse (EAM Software).
- Member of VALE's Integration Competence Center (ICC).
- Conducted technical analysis, architecture, and design for integration

solutions.

- Performed capacity analysis and sizing of the Tibco platform.
- Maintained and configured Tibco integration environments.
- Created prototypes to ensure the feasibility of integration technologies projects.
- Developed BW processes, web services, database adapters, and EMS.
- Deployed architectural mechanisms in Tibco environments.
- Installed and configured Tibco in Brazilian environments.
- Created BW implementation templates and reusable integration assets.
- Contributed to the development of methodology and documentation templates for integration projects.
- Monitored and evaluated integration implementations while suggesting best practices to enhance performance.

Novabase ACD - Banco Espírito Santo, Lisbon, Portugal - Tibco Consultant - 05/2006 – 06/2007

- Designed integration architecture, message modeling, and integrations using Tibco tools between a new Calypso back-office and legacy systems for a Portuguese bank and the European Central Bank.
- Developed BW processes, web services, database adapters, and EMS.
- Conducted capacity analysis and sizing of the Tibco platform.
- Maintained and configured Tibco integration environments.
- Designed and implemented AM solutions (logging and error handling solutions).
- Prepared technical specifications and provided Tibco support.
- Designed infrastructure architecture and handled installation and configuration.
- Created BW implementation templates and reusable integration assets.
- Coordinated and trained development teams.

Accenture - Integration Analyst
01/2002 – 05/2006

- Fully dedicated to activities such as development, research, and training in application integration using Tibco.
- Developed the "Electronic Integration with Customers" project, which won the 2006 Best B2B Category award in steel and mining from Brazil's *B2B Magazine*.
- Designed and implemented EAI-SOA solutions.
- Acted as a consultant for TIBCO-based B2B and EAI projects.
- Conducted technical analysis, architecture, and design for integration solutions.
- Participated in ESB/BPM/BAM technology evaluation for VALE to adopt as new middleware.
- Coordinated POCs using TIBCO Business Works, WebMethods, WebSphere, BEA, and BizTalk.
- Served as a technical consultant for TIBCO infrastructure in VALE projects, including system integration control, updates, migrations, monitoring, and troubleshooting.
- Introduced, developed, and coordinated B2B/EAI using TIBCO as the main platform.
- Provided TIBCO/EAI training for Accenture professionals in VALE projects.
