### ABOUT ME

During my impactful two-year tenure in web development, working in Peshawar, Pakistan, I have assumed a pivotal role in the creation and enhancement of a diverse array of digital products, web applications, and services across various industries and business models. From SaaS to Digital Media and Ecommerce, I have discovered my deepest passion lies in crafting immersive online experiences. Maintaining a keen focus on user feedback, identifying user behavior patterns, and leveraging iterative processes have always been the guiding principles of my work. With unwavering dedication, I continuously strive to deliver exceptional solutions that resonate with users business success.

### WORK EXPERIENCE

**Kokab IT Company Ltd. 06/05/2021**

**Front-end web developer:**

During my tenure at Kokab IT Company Ltd., I have gained extensive experience as a front-end web developer. I have honed my skills in HTML, CSS, Bootstrap, and JavaScript, enabling me to create visually appealing and user-friendly static websites. My dedication to mastering these technologies has allowed me to contribute effectively to the company's projects and deliver outstanding results.

**Vematrix IT Private Company Ltd. 02/06/2021 - 04/06/2022**

**Front-end web developer/ Back-end web developer:**

During my tenure at Vematrix IT Ltd., I had the opportunity to showcase my proficiency in both front-end and back-end development. As a full-stack web developer, I seamlessly transitioned between creating captivating user interfaces using HTML, CSS, and JavaScript, and developing robust server-side functionalities with PHP and jQuery. By leveraging my expertise in both areas, I contributed to the successful implementation of various projects, ensuring a seamless user experience while maintaining the efficiency and security of the backend systems. My ability to bridge the gap between front-end and back-end development allowed me to deliver comprehensive and cohesive solutions that met the clients' response.

**Galaxmo IT Solution Private Ltd. 07/07/2022 – Present**

**Full Stack Web Developer:**

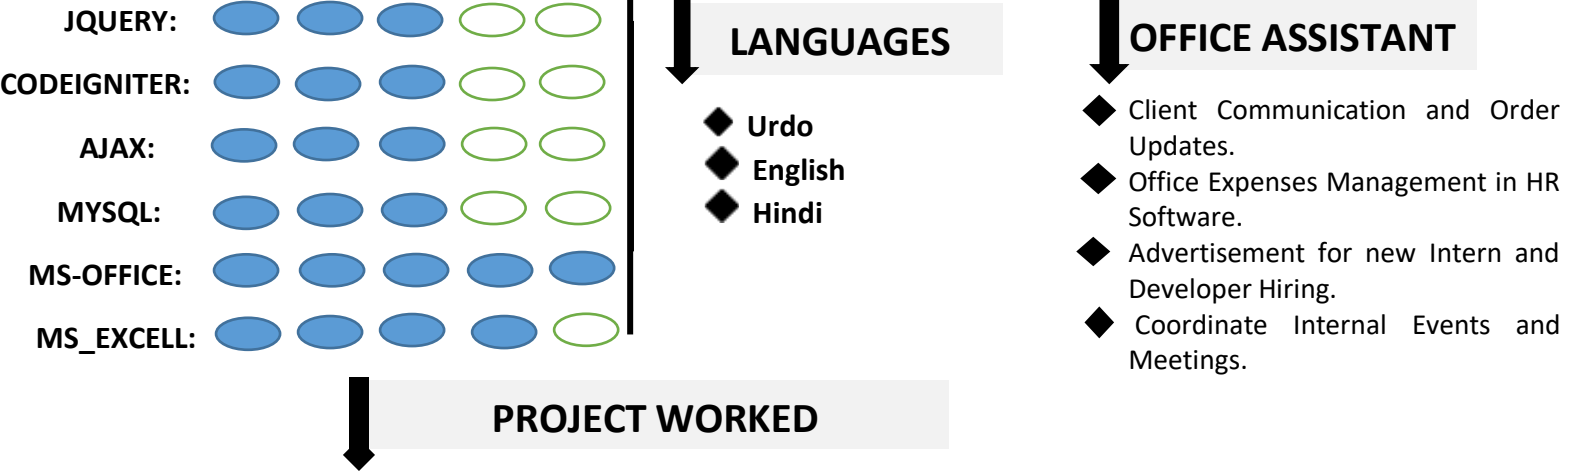

As a full-stack web developer, I have excelled in delivering end-to-end solutions for a wide range of projects. My expertise extends beyond front-end and back-end development, as I have also mastered the CodeIgniter PHP framework. This has enabled me to successfully lead and contribute to various accounting projects, web applications, real estate platforms, and more. By leveraging the power of CodeIgniter, I have developed robust and scalable web solutions, ensuring seamless integration of features and optimal performance. My ability to navigate through complex requirements and translate them into efficient code has consistently resulted in delivering high-quality solutions that exceed client expectations.

### EDUCATION

◆ **BS Computer Sceince : 2017/2021**

**University Of Peshawar, Pakistan.**

◆ **Marks: 3.37/4.00 CGPA**

◆ **WEDDIND HALL MANAGEMENT SYSTEM:** I've skillfully developed a Wedding Hall Management System using PHP and Bootstrap, streamlining online bookings by providing comprehensive hall information and pricing. With a user login feature, clients can conveniently manage and adjust their bookings. The system's captivating design and seamless process underscore my commitment to optimizing user experiences and operational efficiency.

◆ **SHOPS:** I developed a dynamic Shop Management System using PHP, featuring a wide range of functionalities. It includes inventory management, purchase and sale tracking, financial reports, and more. This user-friendly system allows for easy input and retrieval of information, ensuring efficient operations and accurate record-keeping. It simplifies tasks such as generating invoices, tracking expenses, and monitoring stock levels. With comprehensive financial features like cash payments, receipts, and reports, users can gain valuable insights into their shop's performance. This project highlights my ability to design and implement effective solutions for shop owners, enhancing efficiency and streamlining operations.

◆ **BOOK MANAGEMENT SYSTEM:** I have successfully developed a Book Management System using the Codeigniter framework, allowing users to buy books online across multiple categories. With this innovative system, individuals can conveniently browse through a wide range of books and make purchases with ease. By leveraging the features of Codeigniter, I have created a secure and user-friendly platform that ensures a seamless buying experience for customers. The Book Management System enables users to explore different categories, access detailed book information, and complete transactions efficiently. Through this project, I have demonstrated my ability to develop robust web applications that cater to the needs of book enthusiasts and provide a convenient online purchasing platform.

◆ **DAILY EXPENSE MGT SYSTEM:** I have developed an intuitive Daily Expense Management System using the Codeigniter PHP framework. This dynamic system empowers users to effortlessly track their daily expenses and generate comprehensive reports for a clear overview of their spending habits. With a user-friendly interface, individuals can easily add and manage their overall expenses on a daily basis. Moreover, the system offers the flexibility to view and analyze expenses on a daily, monthly, and yearly basis, providing valuable insights for better financial management. By incorporating attractive visuals and robust functionality, this project offers a visually appealing and efficient solution for tracking and analyzing expenses.

◆ **FOOD MGT SYSTEM:** I have successfully developed an innovative Food Management System in PHP, offering a seamless online ordering experience for users. This dynamic system presents a comprehensive menu of delectable dishes, allowing customers to easily explore and place their food orders with just a few clicks. With its attractive and user-friendly interface, this system enhances the convenience of ordering food online. By leveraging the power of PHP, I have integrated advanced features that ensure smooth transactions and efficient order management. Through this project, I have demonstrated my ability to create engaging and user-centric solutions that streamline the food ordering process and provide a delightful culinary experience for customers.

◆ **FURNITURE SHOP:** Step into the world of seamless furniture shopping with my innovative PHP-powered Furniture shop website. Discover a stunning admin dashboard that empowers administrators to effortlessly add, edit, and manage posts, categories, and an extensive range of products. This captivating project is still available online, delivering convenience and elegance to customers worldwide. Explore a curated collection of exquisite furniture pieces, each accompanied by detailed descriptions and captivating images. Embark on a remarkable online shopping experience that combines cutting-edge PHP technology with user-friendly functionality.

◆ **STUDENT MGT SYSTEM:** I have successfully developed an innovative Student Management System in PHP, With its robust admin capabilities, effortlessly add students, assign subjects, and manage their academic records. This remarkable project is a testament to innovation and efficiency, offering seamless student management at your fingertips. Stay ahead of the curve with the ability to promote candidates and track their progress, empowering educators and administrators alike.

◆ **HOSPITAL MGT SYSTEM:** The Hospital Management System (HMS) is a digital solution designed to replace manual, paper-based systems in hospitals. It efficiently controls essential information such as patient details, room availability, staff and operating room schedules, and patient invoices. By implementing HMS, hospitals can streamline their operations, reduce the time and resources required for various tasks, and achieve cost-effectiveness. Managing vast amounts of information is a crucial aspect of hospital operations. This includes patient personal information, medical history, staff data, room and ward scheduling, staff scheduling, operating theater scheduling, and waiting lists for facilities. The HMS automates the hospital management process, enhancing efficiency and minimizing errors. It focuses on standardizing and consolidating data, ensuring data integrity, and reducing inconsistencies. In summary, the Hospital Management System revolutionizes hospital operations, optimizing resource utilization, and enhancing overall effectiveness.

◆ **MUBILE MGT SYSTEM:** I have successfully developed a state-of-the-art Mobile Management System using PHP, introducing a groundbreaking solution for the mobile industry. This innovative system allows users to explore an extensive range of mobile categories, products, and accessories, all within a captivating and user-friendly interface. With a simple click, users can effortlessly add desired items to their cart, streamlining the buying process and enhancing the overall shopping experience. Seamlessly integrating a checkout mechanism, this Mobile Management System ensures a smooth transition from browsing to ownership, offering convenience and satisfaction to users.

◆ **ONLINE QUIZ MGT SYSTEM:** Presenting my achievement: an advanced Online Quiz Management System in Codeigniter. Administrators can effortlessly create diverse quizzes, fostering dynamic learning. Users personalize their journey with test selection, engaging in a time-bound, knowledge-testing challenge. The quiz offers an immersive experience, concluding gracefully and providing insightful performance feedback. This innovation reflects my dedication to enhancing education through user-friendly solutions.

◆ **STOCK MGT SYSTEM:** Successfully created, behold the extraordinary Stock Management System I have crafted in PHP! This robust and intuitive solution encompasses the entire spectrum of inventory control, bringing purchase orders, receiving records, booking records, return records, and sale records together under one unified platform. Seamlessly navigate through suppliers and delve into comprehensive item descriptions, harnessing the power of streamlined operations and unparalleled efficiency. Embrace the future of stock management with this captivating system, where success thrives on meticulous organization and effortless control.

◆ **REAL STATE MGT SYSTEM :** Introducing a revolutionary real estate project that sets new standards in innovation and sophistication. Our cutting-edge system empowers users to effortlessly manage and track plots, availability, sales, and expenses with unparalleled ease. Experience the convenience of comprehensive expense heads and their meticulously maintained ledgers, providing unparalleled financial clarity. Immerse yourself in the seamless functionality of our recovery reports and meticulously designed payment schedules, paving the way for optimized financial growth. Our attractive and user-friendly platform has been meticulously crafted to elevate real estate businesses to unprecedented heights. Prepare to embark on an extraordinary journey where efficiency and elegance converge, reshaping the landscape of the real estate industry.

◆ **FRAGRANCE/PERFUME MGT SYSTEM:** Introducing Scent Inventory, a groundbreaking Fragrance/Perfume Management System that is revolutionizing the industry. With a captivating online presence and an intuitive admin dashboard, we have seamlessly merged technology and luxury. Add, update, and delete perfumes effortlessly, while maintaining complete control over their costs. Our advanced inventory software empowers you to manage suppliers, track invoices, cater to valued customers, and organize products by category and sprays. Experience the convenience of streamlined operations as you effortlessly add, manage, and fulfill orders. Gain financial clarity with expense management, including expense heads, ensuring meticulous control over your business finances. Prepare to embark on a fragrant journey with our attractive and user-friendly platform, designed to elevate your perfume business to unmatched heights of success.
