WORK EXPERIENCE

SENIOR PROJECT ENGINEER – [Nov 2014 – 2022]
Wipro Technologies. – Bangalore, India

Project Profile:

Over 7 years of experience in Software development, UAT Testing and Production issue analysis. Major part of the role spent on development done majorly using Core-Java, Oracle SQL, PL/SQL. Successfully developed changes were merged without any build issues.

- Active participation in Agile team.
- Proficient in writing JUnit test cases using the Mockito framework and finding the code bug in JAVA.
- Extensive experience with banking application, its terms.
- Actively participated in all the stages of SDLC.
- Worked with the BA, QA teams and UAT teams, and ensured 100% data quality to the UAT team before the PROD release.
- Experience with QA verification & validations to ensure the Quality Assurance control.

Project details client:- UBS (Union Bank of Switzerland)

- Working on a bank application which acts a heart of a ledger book deals with the conversion of the feeds from the upstream to generate the reports for the reporting systems such as SAP BO, AXIOM etc; we mostly generate the extract feeds daily and monthly with intra and batch level based on regions, adjustments.

Contribution:

- Developed a new pp/module to generate extract file for particular regional runs.
- Worked on Shell scripting, Python and JIL which reads the file sent by the MFT team and process it efficiently where it handles the user (client) request roles and keeps their roles active based on the validity.
- Have identified major exceptions which was not handled during development and provided way of handling an exception occurred in UAT many times.
- Have won star award from my account for the contribution done to the project.
- Successfully delivered a critical JIRA which was approved 2 days before the UAT release code freeze.

TOOLS USED

- Eclipse – Java programming
- TOAD –Oracle
