PROJECT

JUICE APP PROJECT

Consumption of fruit drinks and beverages is increasing worldwide due to several factors and nowadays, they are very popular all around the world. This project is a delivery application to deliver fruit juice beverages to your doorstep. This application allows you to select real fruit juice-mixed fruit juice that is free from preservatives and artificial ingredients. New users can create a new account and can use that account for ordering different items. It also has different payment methods that include cash on delivery, net banking and card payment.

Software used : swift 4
