NODE-JS DEVELOPER

As an accomplished and motivated backend developer, I am deeply passionate about utilizing my expertise in JavaScript and Node.js to build powerful, scalable, and efficient solutions. My background in both front-end and back-end programming provides me with a comprehensive understanding of how to develop streamlined and user-friendly web applications. I have a strong track record of keeping up with the latest trends and advancements in the field, and I am constantly expanding my knowledge and skills. I am enthusiastic about collaborating with any team, and I am eager to bring my skills, expertise, and passion to contribute to any project

EXPERTISES

- Node js
- Express js
- Mongo DB
- Typescript
- Javascript
- Nest js
- PostgreSQL
- React js

INTEGRATIONS

- Web Socket
- Docker
- Multer
- Razorpay
- Cron Jobs
- Google OAuth 2.0

WORK EXPERIENCE

NodeJS Developer Osperb Innovations

10/2022 - 04/2023

kerela

Osperb Innovations, an end-to-end e-business solutions and software development company in India.

Personal Achievements :

- Utilized TypeScript's static typing to catch errors earlier in the development process and improve the reliability of the applications.
- Demonstrated ability to work together with team members on NodeJS and TypeScript projects, including code review, testing, and debugging.
- Proactively sought feedback from supervisors and incorporated suggestions to improve performance and skillset.
- Took initiative to learn new skills and technologies to enhance value to the company and team.

Backend Developer Xanthron E-Solutions-Pvt. Ltd

04/2023 - 10/2023

kerela

Xanthron e-solutions is a leading IT firm specializing in software development and digital solutions.

Personal Achievements :

- Supported the team and contributed to the project's success by executing tasks promptly and accurately.
- Maintained accurate records of progress and accomplishments throughout the training program.
- Successfully completed assigned training modules or courses with high scores or ratings.
- Contributed to brainstorming sessions and offered new ideas and perspectives for consideration.

- Nodemailer
- JSDOM
- HTML / CSS
- Cloudinary
- JWT

MINI PROJECTS

- **Pharmacy Management**

<https://github.com/mishabp9633/pharmacy-management-nodes>

- **Preloved (E-commerce)**

<https://github.com/mishabp9633/olx-clone-nodejs>

- **Google SSO**

<https://github.com/mishabp9633/Google-SSO>

- **Razorpay Integration**

<https://github.com/mishabp9633/Razrpay-payment-integration>

- **E-Shopee (E-Commerce)**

<https://github.com/mishabp9633/E-shopee-nodejs>

- **Whatsapp-bot-node js**

<https://github.com/mishabp9633/whatsapp-bot-nodejs>

EDUCATION

- **Diploma in Computer Engineering**

Madi'n Polytechnic College
2019 - 2022

- **Higher Secondary**

Commerce with Computer Application
Calicut University Campus
2017 - 2019

PROJECTS

Osperb Teams (SAS Project) - Project Management System

- The system is designed to manage and track projects, including tasks, deadlines, team members, and project progress
- Team members can collaborate and communicate on project-related tasks and updates through the system, providing a centralized location for all project-related information
- Express.js is used as the web application framework for the system, allowing for the creation of a RESTful API that can be easily consumed by frontend applications
- MongoDB is used as the database for the Project Management System, providing a robust and scalable solution for storing project data
- The Project Management System is a live project that is hosted on Digital Ocean, making it accessible from anywhere with an internet connection
- The application is fully implemented in TypeScript, which provides the added benefit of type safety and easier code maintenance

Shobha Gold & Diamonds - Scheme management kit

- I led the development and implementation of the Shobha Gold & Diamonds Scheme Management Kit, an integrated software solution encompassing an admin dashboard, website, and application. This project aimed to streamline and enhance the management of gold and diamond schemes for the renowned jewelry business, Shobha Gold & Diamonds.
- Designed and implemented scalable RESTful APIs using NodeJS, ExpressJS, and MongoDB, optimizing performance and ensuring efficient data retrieval and manipulation.
- Powered by TypeScript to build robust and type-safe CRUD (Create, Read, Update, Delete) functionality within the application.
- Integrated Cloudinary, a cloud-based media management platform, to efficiently handle image and media assets within the application.
- Integrated SMS capabilities into the system to enable real-time communication with customers. This feature was crucial for sending scheme updates, payment reminders, and other important notifications.
