## CAREER SUMMARY

I have over 2 years work experience in primary eye care delivery, efficient patient management and entrepreneurial capacity with a broad experience in the examination, diagnosis of sight problems (near sightedness, farsightedness, astigmatism and presbyopia) management of diseases and disorders of the eye and visual system as well as providing vision therapy.

My core competencies are in refraction, visual therapy, contact lens and ocular pathology as well as proficient use of diagnostic optical devices. Over the years, I have been involved in various outreaches and voluntary medical services. I am able to utilize my computer skills and versatility in Microsoft Office applications in routine front desk operations. I also possess excellent customer service and organizational skills. As an effective team player, I am able to easily apply my skills and knowledge to provide solutions to problems while improving and broadening my abilities.

## CAREER HISTORY
