EXPERIENCE

Blackbuck (Zinka Logistics Solutions Pvt. Ltd.)   *March 2020 - Present*
SDE-1

- Working as a Full Stack developer, have designed and managed multiple dashboards on the Client-side and Microservices on the Server-side using React Js, Redux, Javascript, Java, Spring boot, HTML, CSS, etc.
- Have worked in transitioning the build and deployment process of various microservices from manual to automation using Docker and CI-CD pipeline and leading the team in implementing and following DevOps model.
- Worked as an On-Call POC ensuring in keeping the server health in optimum condition and ensuring timely bug addresses to the concerned teams thus ensuring zero blackouts and cutting down on any user downtime experiences.
- Following the best and latest code practices along with writing unit test cases using libraries such as Jest and Enzyme and react testing library.
- Have managed and coached a team of 3 professionals in React JS and UI/UX design best practices.

GoodWorkLabs   *Sep 2019 - March 2020*
Software Engineer(Frontend)

- Worked onsite at Egovernments, designing, developing, and deploying software to meet client needs and enriching the end-user experience.
- Worked on building various dashboards for modules like Property Tax, Trade License, Fire NOC, and many other modules through which citizens could avail government services, reducing their hassle of visiting government offices and providing them with a corruption-free environment for their clearances.
- Worked alongside internal business partners to compile requirements, build prototypes, and design complex solutions to current and expected software demands.

- Employed best practices in software development to complete high-quality UI applications in line with schedule targets using React Js and Javascript.

Infosys Limited
May 2018 - Sep 2019
Systems Engineer

- Worked as an offshore Frontend React Js developer in Test and Diagnosis Manager(T&DM) and ACT project for client TELSTRA, Melbourne, Australia.
- Designed web and mobile responsive dashboards using HTML 5, CSS3, ES6 JavaScript, Bootstrap, React.js, Redux.
- Worked with data visualization libraries like D3.js, chart.js. Collaborated as a DevOps engineer taking care of day-to-day UI/UX changes along with fixing bugs and issues raised, along with automating the deployment using Bamboo and other Atlassian tools.
- Involved in complete SDLC - Requirement Analysis, Development, System, and Integration Testing.
- Produced precise UI/UX designs to optimize quality control and meet strict requirements using the best coding practices.

ACCOMPLISHMENTS

- Dockerized many microservices and jobs using CI-CD and Docker.
