Indian Council of Medical Research (ICMR) Registration No: MDCSCALTRK

NABL Accreditation No: MC-3604

Method: Real Time PCR

Note:

Assay result should not be interpreted only in the context of other laboratory findings and the total clinical status of patient. This report is for the perusal of doctor only. Not for medico legal cases. Clinical correlation is essential. Please contact us in case of unexpected result. The results relate only to the specimens tested and should be correlated with clinical findings

Interpretation Guidance:

1. Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/ any other health care facility affirming requirements of the case definition/s.
2. A single negative (Not Detected) test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection.
3. A positive (Detected) alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections
