Max Bachat Super Market Hyderabad

- I've worked as a cashier at 'Max Bachat Super Market Hyderabad' for an year and a month during my graduation as a part time.
- Responsibilities: Registers sales on a cash register by scanning items, itemizing and totaling customers' purchases. Resolves customer issues and answers questions. Bags purchases if needed. Collects payments by accepting cash, check, or charge payments from customers and makes change for cash customers.

Direct client - ahmednaveed525@gmail.com   **Jan 2021 – Feb 2021**

Mock Test website - (http://mockspot.com/)

- Created a website which helps students and graduates to test their skills and preparations by conducting assessment exams of university tests, job exams, commission exams and law exams etc, and everyone is able to collect the notes for any type of exams from the website, some assessments are paid and some of those are for free.
- For paid tests users need to pay the required fees online by his/her registered account than concerned users will have been provided the mock test and he/ she can start theirs tests any time and tests has time limitations.
- Project has took twenty five days only to be completed and in the projects used tools and technologies are - **PHP, SQL, HTML, CSS, Bootstrap, JavaScript, JQuery, xampp, Bracket, Apache server, MySQL database**
- Implemented by go-daddy hosting and domain for one year.

Personal Project   **March 2020 – Jan 2021**

Social media type website (https://deveroze.com/our_team.php)

- It connects you to your located area of society to build your community and share anything and without following anyone your whole city will be able to see your posts, after register an account every user would have authority to share anything, and that would shown to those user who has also selected the same city during registration.
- Home menu is users city option on the navigation, there is another option as locations on the navigation, so everyone could choose another city to see posts of another city and also able to create the posts at another city, which would be visible for users from that city.
- Project has took twenty five days only to be completed and in the projects used tools and technologies are - **PHP, SQL, HTML, CSS, Bootstrap, JavaScript, JQuery, xampp, Bracket, Apache server, MySQL database**
- Implemented by go-daddy hosting and domain for one year and certified with Standard SSL.

ACADEMIC PROJECT

E-commerce website,(Final year project - FYP)   **Feb 2020 – Dec 2020**

- It's a website which helps people to find and buy Products on internet. Its useful that makes an easier way to buy Products online. Simulating an Internet invasion into the web server, compromising the EC2 instance.
- An interactive e-commerce solution providing users with an opportunity to buy and sell these Products. Its a first online platform which deals with Regional Warehouses along with track orders. In this website we have basically two modules. The first module includes the customer module and second module includes admin module. The customer have to register for any enquiry related to Products.
- Project has took twenty five days only to be completed and in the projects used tools and technologies are - **PHP, SQL, HTML, CSS, Bootstrap, JavaScript, JQuery, xampp, Bracket, Apache server, MySQL database.**
