PROFESSIONAL SUMMARY

Senior Java Developer with 7+ years of experience in developing and enhancing applications using Spring Boot and Struts 2 frameworks, covering both monolithic and microservice architectures. Skilled in implementing ELK (Elasticsearch, Logstash, and Kibana) for monitoring and logging. Experienced in building applications from scratch and improving existing systems through enhancements and optimizations. Adept at working in fast-paced environments, delivering high-quality, scalable, and efficient solutions.

WORK EXPERIENCE

Java Developer

Al Ansari Exchange (Outsourced Employee), Dubai, UAE

May 2023 – Present

- Developed several modules in the core application of AL Ansari Exchange LLC (AREX / Cash Express).
- Engaged in full software development lifecycle, from design to deployment.
- Developed core changes for Compliance and Operations divisions, focusing on financial transaction flow through AML processes.
- Developed MIS solutions for compliance (AML) and operations back office.
- Built RESTful and SOAP APIs for integration with various agents and banks.
- Designed microservices architecture for WhatsApp channel integration.
- Managed source code using SVN and prepared root cause analysis for production issues.

Tech Stack: Core Java, Struts, JSP, Servlets, CSS, JavaScript, AJAX, Web Services (REST, SOAP), Spring Boot, Spring Security, Microservices, Jasper Reports, SVN (Source Tree)

Senior Software Engineer

JS Bank (Digital Transformation), Karachi, Sindh

June 2022 – April 2023

- Led a team of developers in designing and developing new modules.
- Collaborated with stakeholders for requirement gathering and analysis.
- Developed project plans, timelines, and task assignments using Asana.
- Managed code reviews, performance optimizations, and provided technical guidance.
- Coordinated with QA, DevOps, and business teams for smooth deployment and post-launch support.

Tech Stack: Spring Boot, Spring MVC, Spring AOP, Docker, ELK, React.js, Oracle, SQL Server, GIT (Source Tree)

Senior Java Developer

Paz Technologies, Karachi, Sindh

Feb 2021 – June 2022

- Designed and implemented Java-based applications and solutions for ERP systems.
- Integrated payment gateways, SendGrid API, and Google Authenticator.
- Consumed REST and SOAP APIs for Roambuddy backend portals.
- Deployed applications on AWS EC2 and managed file storage using S3 buckets for HZCO.

Tech Stack: Spring Boot, Spring Security, MySQL, Redis Cache, AWS, Payment Gateway

Senior Software Engineer

Monet DT, Karachi, Sindh

Spring Security, GIT (Source Tree)

July 2019 – Feb 2021

- Worked on the Closed Loop Wallet project, conceptualizing, designing, and coding technical solutions using JAX-RS to develop web services.
- Collaborated effectively with front-end and mobile developers to ensure seamless integration and functionality.
- Participated in monthly learning sessions featuring motivational speakers, enhancing personal and professional development.
- Received multiple performance appreciation letters and was recognized as Employee of the Month for outstanding contributions and teamwork.

Tech Stack: Oracle, Web Services (REST), Spring Boot,

Java Developer

Arittek Solution, Karachi, Sindh

May 2017 – July 2019

- Assisted in the development, testing, and maintenance of Java applications.
- Participated in code reviews and collaborated with cross-functional teams.
- Developed RESTful APIs and backend services using Spring Boot.

Tech Stack: Core Java, Struts, JSP, Servlets, CSS, JavaScript, AJAX, Web Services (REST), Spring Boot, Spring Security, Jasper Reports, Sybase SQL, Financial Messages (ISO 8583, ISO 20022), GIT (Source Tree)

SKILLS

- **Programming Languages:** Core Java (version 8 and higher), JSP, Servlets, J2EE
 - **Frameworks:** Spring Boot, Spring MVC, Struts 2
 - **APIs:** REST, SOAP
 - **Front-End Technologies:** HTML, CSS, JavaScript, jQuery, AJAX, React.js
 - **Reporting:** Jasper Reports
 - **Databases:** Oracle, MySQL, SQL Server, MongoDB
 - **DevOps:** Docker, ELK, GIT, SVN, Jenkins CI/CD
 - **Tools:** Eclipse, STS, IntelliJ, Postman, SoapUI, SQL Developer, Studio3T, PuTTY, WinSCP
 - **Deployment:** Linux, Apache Tomcat, JBoss, WebLogic
 - **Cloud Technologies:** AWS (EC2, S3 Bucket), Linode
 - **Other:** Node.js (Sound Knowledge), Redis Cache, Swagger UI
-

PROJECTS

Supplementary Credit Card: Developed modules for processing customer data and generating SMS links for supplementary credit card requests, allowing customers to submit requests easily.

AREX/CashExpress: Developed a core banking application for Al Ansari Exchange supporting various financial services like membership creation, remittance, and AML monitoring.

Centralization Feedback Project: Created a REST API for collecting feedback from various channels, aggregating responses, and generating visual reports for analysis.

Remit Dispute Module: Integrated dispute functionality into a WhatsApp bot, enhancing user convenience for raising disputes.

Instant Personal Loan Project: Developed a system to process loan applications and track statuses via SMS notifications.

HZCO Web Application: Created a comprehensive platform providing legal, advisory, tax, and accounting services.

Roambuddy Application: Designed to reduce data roaming costs for travelers through various products including eSIMs and mobile Wi-Fi devices.

Closed Loop Wallet (E-commerce Web Application): Developed a digital wallet facilitating seamless transactions within a specific ecosystem.

Smart Extraction: Migrated data from Oracle to MongoDB for enhanced reporting capabilities.

Befiler: Launched Pakistan's first online portal for simplified tax filing.

EDUCATION

Bachelor of Science in Software Engineering

University of Sindh, 2013 – 2016

INTERESTS

Learning new advancements in Java and related technologies.
