“Commitment is the key to success”. I commit to those things which I’ve expertise in. I am Software Engineer holding bachelor degree, having 6 plus years of experience. I worked on many projects in my professional career and highly skilled in ASP.NET MVC, .NET Core, and web APIs, Angular and always open to learn new language, frameworks and technologies, if needed to satisfy client’s needs and demands.

### **EXPERIENCE:**

#### **United Business Systems (sole Proprietorship LLC. Abu Dhabi. UAE): (Jan. 2023 Present)**

Software Engineer (Full Stack .NET Core Developer)

Working as full-time software Engineer in UBS dealing property management system, software development department from Jan 2023. Currently working on maintenance of old projects and adding new features to the new ones. I have the responsibility of ensuring all the security projects are functioning correctly, removing pitfalls, enhancing the reliability and performance of projects under development as well as developing new projects.

#### **Total E BizSolution (Singapore): (Nov 2020 – Dec 2023)**

Software Engineer (.Net Developer)

Working as full-time software Engineer. From requirement gathering and analysis to database design and web Api’s to front end implementation, taking part in every part of development, ensuring the software developed is confirming the requirements.

This is a project for Online Insurance Web Portal for getting the policies related data, user can check the policies details. Here I have the responsibility to create the Project for client after analyzing the requirements from functional specifications.

#### **Precise Technologies (Peshawar, Pakistan): (June 2016 – Sep 2017)**

Software Engineer (NET Developer)

Working as full-time software Engineer. From requirement gathering and analysis to database design and web Api’s to front end implementation, taking part in every part of development, ensuring the software developed is confirming the requirements.

#### **MTBC (Islamabad, Pakistan): (May 2015 –June. 2016)**

Software Engineer (.NET Developer)

Worked on Obtain Care and SACS as a backend developer. It is a web-based application Logic powered solutions is developing for reputable American client. Basically, obtain care deals with all type of medical insurance claims. SACS is a full fledged product for conducting surveys and psychometric testing
