Career Objectives:

I am a pragmatic, highly adaptable Oracle Application database & middleware specialist (OCP) who has the ability to work under pressure and in confidence with colleagues, superiors and customers alike. With over **10years'** experience, from March, 2013 to present, I am good at analyzing critical issues, challenges and priorities, resolving them in an efficient and resourceful manner through the use of my good communication and experience. I work very successfully without supervision and thrive in challenging environments.
