WORK EXPERIENCE

Software Engineer

Infinite Computer Solutions Pvt Ltd.

01/2024 - Present

Noida

Achievements/Tasks

- Optimized the performance of Angular applications through **lazy loading**, AOT (Ahead-of-Time) compilation, and code splitting.
- Worked on advanced angular features like **encryption decryption** and data handling.
- Implemented various security features which include **authentication and authorization** through **JWT** and other methods and maintaining **session** for a particular given time

Software Engineer

Coditas Solutions

05/2022 - 08/2023

Pune

Achievements/Tasks

- Implemented **NgRx for state management** in Angular applications, ensuring a predictable and scalable application state.
- Designed and maintained application stores with **actions**, **reducers**, and **effects** for managing complex business logic.
- Implemented **reactive programming concepts using RxJS** to handle asynchronous operations and event streams effectively.
- Designed and implemented an **idle service** to detect user inactivity and enhance application security by automatically logging out inactive users.

Angular developer

Apptunix Private Limited

02/2021 - 05/2022

Mohali

Achievements/Tasks

- Implemented route protection in Angular applications using **Auth Guards** to restrict access based on user roles and authentication status.
- Built **HTTP Interceptors** to manage API requests and responses, ensuring consistent authentication and error handling across the application
- Handled **API requests and responses**, including error handling and data transformations.
- Applied lifecycle **hooks** and **pipes** together to optimize application workflows, ensure real-time updates, and deliver a dynamic user experience.

PROJECTS

1. Akunamatata Project

- Configured and set up the e-commerce project with separate **admin** and **vendor** panels.
- Designed and implemented the database structure to manage products, categories, sub-categories, brands, and vendor information.
- Implemented a role-based access control system, allowing the assignment of sub-admins with different roles and responsibilities.

2. BASIX Project

- Integrated a CRM tool into the e-commerce platform to manage and track sales-related activities.
- Extended the role-based access control system to include roles such as sales agent and admin for the CRM tool.
- Developed a customer interaction module within the CRM tool to facilitate direct communication between marketing agents and customers.
