### Career Objective

Seeking a challenging role where I can apply my skills as a native mobile app developer (iOS/Android) and continue to grow professionally.

### Summary

I am a skilled mobile application developer with over three years of experience in native iOS development. Proficient in Swift, with hands-on experience in RESTful API integration, JSON parsing, and third-party API integration using tools like Moya and Cocoapods. Experienced in building user-friendly interfaces, handling localization, Dark Mode, and push notifications

### Work experience

iOS Developer Dec,2023 - Aug, 2024

Koraspond, Saudi Arabia

created and maintained iOS apps to guarantee improved usability and performance. worked with **UIKit**, **Moya**, **Google Places API**, **Google Maps**, **Zoho live chat SDK**, **Swift**

- **Stylz:**

- Fixed a few UI and **localization** issues
- Fixed the **Apple Pay** issue for the Arabic language and then worked on deleting user account functionality

iOS Developer June, 2023 - Nov,2023

Trrev Technology, India

- **Doctors App - For Doctors:**

- added new features and improved the old ones.
- Fixed bugs and improved the user interface (UI) for better user experience. and refactored code for code scalability
- worked on video calling, document uploading, prescription generation, billing view, and appointment management features.

- **Doctors App - For Patients:**

- Developed the entire patient-side application from scratch.
- worked on searching nearby doctors functionality using **Google Places API**.
- used **UIKit**, **Swift**, **URLSession**, **Firebase push notifications**, and **Google Maps**
- Implemented appointment scheduling and prescription management functionalities

iOS Developer Oct ,2020 - June, 2022

Gexton INC, Pakistan

I worked on multiple iOS applications, focusing on bug fixes and feature enhancements.

- **Bayhass** (Swift): integrated the **HyperPay payment gateway** and made a few minor updates.
- **Express-IT** (Swift): updated color schemes, fixed notifications, and **Dark Mode**
- **Easy Quran** (Objective-C): Conducted minor bug fixes and code optimization

### Academic Projects

- **E-Commerce app FYP**: an Android application created using Java, MySQL, and Firebase.
- **Cash Deposit Machine** (Automata Project): a C#-based project
- **My Own Compiler** (Compiler Construction Project): a basic compiler developed using C#.

### Education

Bachelor of Science, Computer Science  
University Of Karachi (UBIT)

2016 - 2019

### Portfolio

Turing Profile:

### Skills

- Unit Tests
- Localization
- Push Notification
- Dark Mode handling
- Firebase and Google Maps
- Version control, Git & Github
- Deep linking (universal links)
- Apple Pay, Google SignUp, and Facebook SignUp SDK integration
- Third-Party API Integration: Cocoapods
- AppStore: Certificates, Profiles, Build uploading
- Local Storage (Offline Storage): SQLite, SQL, and Realm
- Socket Programming & Object-Oriented Programming
- iOS Development (Native): (Xcode, Swift, SwiftUI)
- Android Development (Native): Intermediate level (Android Studio, Java)
- RESTful API Integration & JSON Parsing: URLSession, Alamofire, Swiftyjson, ObjectMapper, Moya
