-

Team Lead

September 2015 – November 2018

Ecifm, Gurugram, India

Project: Service On The Go

As with Services On The Go!, Inventory managers can create regular cycle count tasks in the desktop version of IBM TRIRIGA and dispatch work to the field and warehouse staff on their mobile devices. In offline mode, Services OTG! works independently from the network and database so that users can be truly mobile and perform their duties without disruption. Unlike so-called Perceptive Apps, OTG! is a truly native application that doesn't rely on a constant connection to the database. Data is synchronized when the device is back in range of Wifi or cellular. The mobile app prioritizes data syncing, ensuring that those offline entries won't overwrite any entries made by colleagues in the interim.

Responsibilities

- Experience with Common native iOS framework APIs (Maps, Bluetooth, Camera etc.)
- Worked to make the application Compatible with multiple iOS versions.
- Evaluated tasks progress regularly and mentoring individuals.
- Worked closely with product managers and designers to define a rich iOS experience for the user.

Software Development Engineer

November 2012 – September 2015

AgreeYa, Noida, India

Project: Eagle Eye

Worked on EXL BPO Container Application (a robust ERP application designed) for flexibility, security and ease of use for maintain and track their Processes, examine summaries and other relative valuable information and complex graphical reports from anywhere at any time.

Responsibilities

- Worked closely with product managers and designers to define a rich iOS experience for the user.
- Involve in bug review meetings to analyze the nature of bugs raised and resolved bugs at various stages of application development.
- Technical requirement documentation for the product.

Software Engineer

February 2012 – November 2012

Vinove, Delhi, India

Project: Invoicera

Invoicera, the cloud based invoice and billing solution empowering account receivable and account payable management for over 3 million businesses worldwide. Invoicera helps to automate and simplify your business processes and communication with online invoicing and payments, purchase order management, recurring/subscription billing, multi lingual & multi currency support, client/vendor panels, time tracking, workflows, expense management, staff permission and sub-contractor billing and time management.

Responsibilities
