WORK EXPERIENCE

QA/QC MECHANICAL ENGINEER (2017 - PRESENT)

SAYAH ENGINEERING CONSULTING BUREAU

- Sayah Engineering provides professional services ranging from feasibility studies to engineering design to contract management and construction supervision.
- Primary responsibilities are on inspection of mechanical items such as piping, tanks, pumps, motors, etc. from material evaluation, fabrication and assembly phases, and during installation on site, including issues on corrosion.
- Secondary responsibilities are support for the inspection of civil and electrical works such as witnessing of soil compaction test, concrete pouring on slabs, columns, etc. and check cube samples.
- Check sub-contractors' activities including verification of personnel qualification, plans, method of statements or procedures if according to project codes and specifications, equipment and tool calibration, and safe working conditions.
- Prepare inspection reports, issue non-conformance and analyze the root causes, and evaluate the proposed solutions.
- Followed company procedures to maintain work environment in a neat and orderly condition.
- Prepare quotation requests and perform negotiations with sub-contractors.
- Assisting in preparation of bill of quantities, specification and list of manufactures.
- Maintain quality control by assisting in approving sub-contractor nominations and materials.
- Manage client relations.
- Collaborated with Engineering, construction and commissioning departments to ensure smooth work flow and efficient organization operations.
- Attended meeting with government departments, including Abu Dhabi Distribution Company (ADDC), Urban Planning Department (UPD) and Department of Transport (DoT).

PRODUCTION ENGINEER (2016 - 2017)

RS AUTO COMPONENT

- Production of Automotive parts as per the drawings by using CNC Machine from raw materials to final products.
- Enforce safety and sanitation regulations.
- Observe work and monitor gauges, dials, and other indicators to ensure that operators conform to production or processing standards.
- Inspect materials, products, or equipment to detect defects or malfunctions.
- Plan and establish work schedules, assignments, and production sequences to meet production goals.
