Profile

Enthusiastic and detail-oriented Full Stack .NET Developer with a fresh graduate background from the Information Technology Institute (ITI) & Digital Egypt Pioneers Initiative (DEPI). Adept at designing, developing, and maintaining both front-end and back-end solutions using the .NET framework and modern web technologies.

Internships

2024/05 – 2024/11	**Full Stack Web Development using .Net.** *Intensive Code Camp at Information Technology Institute (ITI)*
2024/04 – 2024/10	**.Net Web Development** *Digital Egypt Pioneers Initiative (DEPI)*

Projects

--E-Commerce Website (Clone of B-Tech) ⬀

ASP .Net Core API , Angular and Onion Arch

Developed a full-stack e-commerce application using **ASP .Net Core API** for the backend and **Angular** for the frontend, implementing features like product management, user authentication, and order processing. Ensured secure, scalable, and efficient performance through API design,localization,responsive design and cloud deployment.

--Admin Dashboard for E-Commerce Website ⬀

ASP .Net Core MVC and Onion Arch

Developed an **Admin Dashboard** for an e-commerce website using **ASP .Net Core MVC**, enabling product, order, and user management with role-based access control. Implemented a responsive UI with CRUD functionality and data visualization for efficient admin operations.

--Online Educational Platform Webiste

ASP .Net Core MVC and 3-tier Arch

Developed a feature-rich online educational platform using **ASP .Net Core MVC**, implementing functionalities such as user registration, course management, video streaming, quizzes, and student progress tracking. Integrated a responsive UI, role-based access, and interactive learning features for both students and instructors.

--Real-Estate Webiste

Front End Only

Designed and developed the frontend of a real estate website using **HTML**, **CSS**, and **JavaScript**, featuring property listings, search functionality, responsive layouts, and interactive property filters. Focused on creating an intuitive user experience with clean, modern design elements and smooth navigation.

--E-Commerce Desktop App.

.Net & Windows Forms and Onion Arch

Developed a fully-functional e-commerce desktop application using **.NET** and **Windows Forms**, enabling features like product management, order processing, user authentication, and shopping cart functionality. Focused on creating a smooth user interface, efficient data handling, and a seamless shopping experience for customers.

Work Experience

2023/07 – 2024/05	**Senior Technical Office Engineer** *Care For Constructions & Maintenance*
2022/08 – 2023/06	**Senior Technical Office Engineer** *Arfa Group for Contracting & Industry*
2020/03 – 2022/07	**Technical Office Engineer** *Al-Masrya Company for Contracting & Trades*
2019/09 – 2020/02	**Technical Office Engineer** *Al-Harameen Company for Contracting*
