EXPERIENCE

Worked as Technology Analyst (TA)

INFOSYS Hyderabad

09/2019 - 08/2024 India

- Engaged in the design, development, and implementation of innovative software solutions.
- Utilized strong understanding of Java and Agile methodologies to effectively manage projects and collaborate with diverse teams.
- Focused on continuous improvement and adaptation to new technologies to enhance overall project delivery.
- Led the development of scalable applications, ensuring high performance and reliability.
- Worked closely with stakeholders to gather requirements and translate them into technical specifications.

Worked as Software engineer

Shanta software solutions

09/2016 - 09/2019 Hyderabad

- As a Software Engineer at Shanta Software Solutions, focused on designing and developing robust software applications tailored to meet diverse client needs.
- My responsibilities included analyzing client requirements, implementing scalable and efficient code, and collaborating with cross-functional teams to deliver high-quality solutions on time. I also ensured adherence to best practices in software development, optimized application performance, and actively contributed to debugging and maintenance efforts to enhance user satisfaction.
- This role involved using Java, Spring boot and react JS, to create efficient code and facilitate project completion.
- Engaging with clients to understand their requirements and delivering solutions on time was a key aspect of this position.
- Collaborated with cross-functional teams to define project scope and objectives.
- Utilized version control system to manage code changes and ensure project consistency.
- Participated in code reviews, contributing to team knowledge sharing and best practices.
- Assisted in the deployment of applications and provided support to clients.

Project # 1 ACentricity

ACentricity

client :US

ACentricity is CRM Software designed for Group Health and Life insurance business market place. It is a web-based system which is used by the insurance agencies to supplement the needs of any organization which provides policies to their employees. The application besides maintaining all the details about policies, Companies and Carriers, it also manages

- ACentricity is CRM Software designed for Group Health and Life insurance business market place
- It is a web-based system used by insurance agencies to supplement the needs of any organization providing policies to their employees
- The application maintains details about policies, Companies, and Carriers, and manages workflows assigned to staff of an agency

SUMMARY

To pursue a highly rewarding career, seeking for an opportunity to work as a full-stack web developer in a challenging and healthy work environment where I can utilize my skills and knowledge efficiently for organizational growth as well as individual goals.

Having around 7+ years of experience in designing and development of web applications using Java/J2EE and spring ,spring boot, React JS and support.

Hands on experience on technologies like , **React JS, HTML, CSS, JS,Java, JDBC, Servlets and micro services.**

Having very good implementation knowledge of OOPs concepts.

Analyzed and proposed implementation process and tools to implement web services.

Worked with business users and business analysts to capture the business requirements for enhancements and new system development.

Having working experience on frameworks like **Hibernate, Spring and spring boot, react Js, and runtime environment node JS.**

Hands on Good knowledge in writing Web services using Java

Strong developing experience in **HTML5, CSS, CSS3,Tailwind CSS, Bootstrap 3,Bootstrap 4.**

Good developing experience in **ADA Web Accessibility.**

Highly organized and independent able to effectively coordinate tasks to accomplish projects with timeliness and creativity.

Efficient in fast-paced multitasking environment; able to prioritize effectively to accomplish objectives with creativity and enthusiasm.

Experience with Tomcat web server and knowledge on Tomcat Application Server. applications.

Strong experience on Strings, Exception Handling, collection framework for representing and manipulating.

Excellent commitment, dedication and planning towards goal oriented tasks.

KEY ACHIEVEMENTS

Performance Enhancement

Improved application performance by 30% through code optimization.

Project Leadership

Led team to deliver project 20% ahead of schedule.

Quality Improvement

Reduced bug rates by 25% through code review processes.

EXPERIENCE

Project# 2 National Health Care Services

📍 Client Canada

The main object of the NHS project is the UK Government get the Analysis report on cardiology patients. Every place in UK NHS Have small and grouped clinics that are mapped to One hospital and get the reports from these clinics.

- Developed dynamic html templates using HTML5, CSS3, jQuery. Developed the html pages to be ADA compliant 2.1 as per the Web Accessibility guidelines.
- Performed unit testing for the developed html pages using JAWS software in order to achieve the ADA compatibility.
- Coordinated with the clients to gather the requirements and also got appreciation for the delivered content.
- Coordinating with team members to achieve goals as per proposed timeframes.
- Engaged with the Quality Assurance Team in bug fixing sessions to optimize usability.

Project # 3 Walmart

Walmart (Walmart retail corporation.)

📍 Client US

Walmart is a multinational retail corporation that operates a chain of hypermarkets, discount department stores, and grocery stores.the company has grown to become one of the world's largest retailers, with a presence in 27 countries and a global workforce of over 2.3 million associates

Team Size : 8
Database : Mysql.DB2
Environment : React JS, html, css, Tailwind css JS,Hibernate, spring boot, node js

- Responsible for the day-to-day maintenance of application systems in operation, including tasks related to identifying and troubleshooting application issues
- Responsible for translating requirements into technical solutions, focusing on creating the best user experience for customers
- Provide technical solutions to support engineers who will provide round-the-clock support, collaborating closely with stakeholders in the US
- Perform RCA to identify underlying causes of issues and implement corrective actions
- Reviews, tests, and debugs team members' code to ensure optimal functionality

EDUCATION

Post Graduation in MCA

Osmania University

📅 01/2013 - 01/2016

- (Master in computer applications) from Osmania University

Graduation in Bsc

Osmania University

📅 01/2009 - 01/2011

- (computer Science) from Osmania University

KEY ACHIEVEMENTS

Client Solutions Implementation

Successfully implemented client-driven software solutions.

SKILLS

React JS	Css	CSS3	Javascript
ES6	spring boot with micro services		
Bootstrap 4	HTML5	Html	
Build Tools	Core Java	Tailwind css	
DB2	Debugging	Design Patterns	
Eclipse	Express.js	Node JS	
API Development		Git	Github
Heroku	J2EE	JDBC	Jquery
JUNIT	JWT	LOG4J	Maven
Mongodb	Mongoose	SQL	
Microsoft Visual Studio			Linux
