## PLANT OPERATOR/SUPERVISOR

00971 50 8423302

yhaabba@gmail.com

DUBAI, UNITED ARAB EMIRATES

### PROFESSIONAL SUMMARY

Monitor manufacturing plant operations through SCADA software. A qualified, responsible and very experienced operator with comprehensive skills and knowledge of the equipment and machinery used in the operating process. Has undertaken a wide range of relevant health and safety training for the job and always adheres to safe operating policies and procedures, including safe systems of work and risk assessments. Works with maximum efficiency and always pays attention to detail. Is good at spotting any faults the equipment/machinery might develop and reporting these. Has excellent problem solving skills and can communicate effectively where customers are involved in the operations process (e.g. checkout operator). Can take instructions and follow working diagrams and plans, as well as work under own initiative. A valuable member of any team with excellent timekeeping skills. Able to keep records relating to the operational process and track/log maintenance requirements for any equipment and machinery under own control.

### EXPERIENCE

#### PLANT OPERATOR

Operates concrete, asphalt, or sand and gravel plant to batch, crush, or segregate materials used in construction: Moves controls on panelboard or control board to heat, dry, and mix ingredients, such as asphalt, sand, stone, and naphtha, to produce asphalt paving materials; to weigh and mix aggregate, cement, and water to produce concrete; or to control feeding, crushing, and sifting machinery in sand and gravel plant.

#### CEMENT PLANT OPERATOR

Adjust controls to generate specific electrical power or to regulate the flow of power between stations and substations.

Take regulatory action, based on readings from charts, meters and gauges, at established intervals.

Inspects records or log book entries or communicate with plant personnel to access equipment operating status.

Control or maintain auxiliary equipment, such as pumps, fans, compressors, condensers, feed water heaters, filters, or chlorinators, to supply water, fuel, lubricants, air, or auxiliary power.

#### CONMIX [R M C ] SHARJAH 2004 TO 2005
