

NIHTHIYA ALTHAF

ANDROID APP DEVELOPER

OBJECTIVE

Results-driven Android Developer with a proven track record of delivering high-quality software solutions. As a seasoned Software Development Engineer (SDE) 2, I bring over 6.8 years of hands-on experience in architecting and developing robust Android applications. Proficient in Kotlin, Java, Retrofit, AWS Integration, Agile, and Jetpack Compose, I excel in dynamic, collaborative environments.

Throughout my career, I've demonstrated leadership by successfully guiding cross-functional teams in designing and implementing complex features, consistently meeting and exceeding project goals. My commitment to continuous learning ensures that I stay at the forefront of industry trends and emerging technologies, contributing to the innovative success of each project.

PROJECTS

Vajro Admin App

Shopify Mobile App builder. Features upgrade. Enhance App performance by maintaining code standards. Technologies used: Kotlin, Java, Rest API integration, MVVM, Hilt, Jetpack Libraries, Analytics, FCM, etc.

Podcast Tamil

The app is designed to listen to Children's Stories, Poems, etc., Users can download audio inside the app. Integrated with Push Notification, Google Ads, and custom ads.

Localee

This is the application used to order food online. Localee has login for the delivery boy and user. The delivery boy app receives user orders and delivers food to the corresponding user.

Rahisi Pay

E-commerce payment app. This app has functionality such as QR Scanner, and Integrated VISA SDK, which allows users to make payments for the services from their rahisi wallet.

iBoss

This application is related to maintaining student attendance details. Staff can also post attendance in offline mode.

Pickme Taxi

Transport app where users can select pickup location and destination. location. Based on the distance, an estimated fare amount will be displayed, and the user can book a cab. On the driver's app, the user request will pop up. After accepting the ride, both the user and driver can be able to view the details.
