PROFILE

Telecommunications Engineer with over 1.9 years of experience in designing, implementing, and installing telecom equipments. Proficient in network design, RF Engineering, and the deployment of 4G/5G technologies. Strong background in optimizing network performance and ensuring seamless connectivity in diverse environments. Skilled in troubleshooting and resolving complex issues, with a deep understanding of industry standards. Proven track record of leading cross-functional teams, managing large-scale projects, and driving continuous improvement initiatives. Committed to delivering high-quality solutions that enhance communication systems and meet evolving business needs.

WORK EXPERIENCE

IMMCO

2022 - 2024

Telecom Engineer

- Perform technical evaluations of systems and projects
- Prepare technical and procedural documentation required
- Provide technical guidance and support to colleagues
- Address, propose, design software solutions to address complex business needs
- Monitoring the performance of telecom systems, networks, and devices to ensure they are functioning properly
- Providing first-level technical support to customers or internal users, addressing queries and issues related to telecom services
- Coordinate with other teams, and clients to facilitate the smooth operation of telecom services. Delivers an excellent customer experience, helping and giving solutions to their queries
- Follow established procedures, safety protocols, and industry standards in the execution of all tasks
- Engage in continuous learning to stay updated with the latest telecom technologies and practice
- Wireless Engineering services are available for 4G upgrades and 5G network projects
- Expertise in 3G, 4G, 5G Technologies and Installation, Antenna Installation, CANRAD, RFNSA, Micro/ Macro Sites, RRU, TMA and Junction devices
- Undertake works connected to the 5G wireless project such as Preliminary Design (PD), For Construction (FC), TX FC, and RLM (Red Line Markup)
- Assist with electrical design, focus on power and heat load calculations
- Experience in planning, designing of Telecommunication equipment and creating network design as per client's requirements
- As a Telecommunication specialist with a strong interest in network designing I have gained extensive knowledge in UDD and IDD
- Maintained a friendly manner and calm, positive demeanour when handling complaints
