Projects

Bus Reservation System

- A web-based bus reservation platform built using Django.
- It offers users a seamless experience for searching buses, booking tickets, and managing reservations.
- The system features user authentication, dynamic bus listings, and an intuitive ticket booking process with real-time seat availability.
- A secure payment gateway integration ensures safe transactions.
- The admin panel provides tools for managing bus schedules and overseeing bookings.
- The application is designed with a responsive interface, ensuring accessibility across various devices.
