SUMMARY – Software Consultant | 10 Years of Experience

- 10+ years in web application development with expertise in Java/J2EE, delivering projects from inception to production.
- Led teams, ensuring timely delivery of results across various domains including HCM, HRM, Finance, E-commerce, and Security Management.
- Proficient in Micro services, SOA, Event-Driven Architectures, and front-end technologies (HTML, CSS, JavaScript, Angular, and React).
- Focused on continuous improvement and adherence to best practices, coding standards, and comprehensive testing.

TECHNICAL SKILLS

Programming Languages	: JAVA 21, 17, 11, 8.0 & 6.0, PHP 5.0
Web server technologies	: J2EE (JSP 1.2, Hibernate 3,4,5,6, Spring Framework (MVC, Boot, Integration, Security, Cloud, JPA, Batch, Reactive), Struts 2.3, Apache Kafka, Camel, Besmarte, Volly, Blend. 12 Factor App.
Web client technologies	: JavaScript, jQuery, CSS, HTML4 & 5, CSS3, Angular 5, 7, 11, 16 Ajax, Bootstrap.
Middleware	: Apache Kafka, Rabbit MQ, IBMQ.
RDBMS	: Oracle 11g, 12 C, MySQL, Postgres, SQL, SAP, Rocket Universe.
Operating System	: Windows, Linux.
Source Control	: SVN, GitHub
Web Server	: JBOSS, Apache Tomcat, Glassfish, Jetty, Netty.
Tools	: IntelliJ, Eclipse, Spring Source Tool Suite (STS), Jenkins, JIRA, VS Code, Postman, Altova, J meter, Xml Spy, Source tree, Scrum Pocker.
Designs	: UML, Design Patterns, Micro services, MVC, BPMN, Draw.io, Event Sourcing, Event Driven, SOA, 12 Factor App
Work Flows	: Netflix Conductor, Camunda

ORGANIZATION DETAILS

Organization	Designation	Duration
Emaratech	Senior Software Engineer	August 2023 -- Present
Nisum	Tech Lead	Dec 2021 -- July 2023
Contour Software's	Senior Software Engineer / Team Lead	Nov 2019 -- Dec 2021
Nakisa Inc.	Lead Software Engineer	Mar 2015 - Oct 2019
Pinnacle Technologies	Software Developer	Mar 2014 - Mar 2015

PROJECTS DETAILS

Organization	: Emaratech	Role	: Senior Software Engineer
Duration	: Aug 2023 to Present	Title	: Dubai Smart Channel Applications

Roles and Responsibilities:

- **System Design & Development:** Led the design and development of new architectural frameworks, addressing system pain points and collaborating with UI/UX and backend teams for seamless integration.
- **Team Collaboration & Mentorship:** Coordinated with cross-functional teams for requirement gathering, guided team members in coding and logical challenges, and presented technical solutions to stakeholders.
- **Prototype & Technology Stack Implementation:** Designed and implemented prototypes using defined technology stacks, ensuring alignment with project objectives and technical feasibility.

Organization	: Nisum	Role	: Tech Lead
Duration	: Dec 2021 to Jul 2023	Title	: Enterprise Tracking Service

Roles and Responsibilities:

- **Technical Leadership:** Led a team of 5, mentoring members and managing task allocation with JIRA while generating detailed progress reports..
- **Client Collaboration and Project Management:** Engaged directly with clients for requirement gathering, project planning, estimation, and reporting for billing purposes.
- **System Design and Implementation:** Designed and implemented prototypes, investigated technology stacks, and presented solutions to stakeholders.

Organization	: Contour Software's	Role	: Senior Software Engineer/Team Lead
Duration	: Nov 2019 to Dec 2021	Title	: LOS (Loan Origination System)

Roles and Responsibilities:

- **Technology Upgrade:** Upgraded core applications to the latest technologies using micro services architecture and developed APIs to integrate LOS with platforms like Besmartee, Volly, Blend, and Intuvo.
- **API Development:** Created APIs for generating data models from Universe Database and implemented Conductor integrations for queue and service management
- **Quality Assurance & Standard Compliance:** Ensured zero open defects within SLA, adhered to software development standards, and conducted thorough unit and functional testing for all development tasks.
- **Project Ownership & Collaboration:** Validated technical specifications, collaborated with technical leads, and ensured release success through accurate, well-reviewed, and high-quality code.

Organization	: Nakisa	Role	: Team Lead
Duration	: Nov 2017 to Oct 2019	Title	: FIN (Lease Administration)

Roles and Responsibilities:

- **Product Development & Core Functionality:** Developed a Lease Administration product using micro services architecture, including a Core Engine to calculate lease formulas and generate schedules (Month-End and Mid-Month). Designed import/export features for CSV and Excel and provided support and bug fixes for existing modules.
- **Code Quality & On-Time Delivery:** Ensured code quality through reviews, maintained guidelines, and consistently delivered tasks on time with complete accuracy.
- **Team Management & Task Coordination:** Managed a team by assigning roles, distributing tasks, and tracking progress, ensuring successful releases with high-quality outputs.

Organization	: Nakisa	Role	: Senior Software Engineer
Duration	: Mar 2015 to Nov 2017	Title	: HCM (Hanelly Organizational Transformation)

Roles and Responsibilities:

- **Software Modernization & Dashboard Design:** Collaborated with the team to redesign obsolete software using the latest technologies and created dashboards for data visualization.
- **Feature Development & Maintenance:** Designed export functionality for MS PowerPoint and MS Visio, while supporting and fixing bugs in existing modules.
- **Timely Delivery:** Ensured on-time delivery of all assigned tasks with high accuracy and quality.

Organization	: Pinnacle Technologies	Role	: Software Developer
Duration	: March 2014 to March 2015	Title	: Commercial Media Application

Roles and Responsibilities:

- **Design & Development:** Designed, developed, and performed unit testing to deliver robust software solutions.
- **Software Modernization:** Collaborated with the team to modernize legacy software using updated technologies..
- **Data Visualization & Reporting:** Created dashboards for data visualization and developed comprehensive reports for the financial module.

TRAININGS & CERTIFICATIONS

- Certification of learn Apache Kafka for beginner.
- Certification of Learn java lambda expressions.
- Certification of Functional programming with java.

EDUCATIONAL QUALIFICATION

- Bachelor of Information Technology from Division of Science and Technology, University of Education
- Fsc Pre Engineering from Govt. College Town Ship Lahore
- Matriculation from Govt. high school green town Lahore.

AWARDS & ACHIEVEMENTS

- Best Programmer of the session award.
- Merit Laptop from Prime minister laptop scheme.
