PROFILE SUMMARY

Process oriented Quality Control Professional with proven track record of success in quality control and assurance, chemical analysis, production and product development within diverse industries. In depth knowledge of quality standards and procedures, quality improvement principles, statistical analysis and process improvement. Acquired extensive experience in enhancing quality of a product, inspecting and testing products, monitoring operations to ensure high product standards, preparing reports and monitoring use of equipment. Strong analytical ability with keen eye for detail and capable of troubleshooting problems and successfully implementing new methods and producing innovative solutions.

AREAS OF EXPERTISE

Quality Control & Assurance | Product Development | Evaluation & Analysis | Testing | Product & Material Inspection | Pharmaceutical Chemistry | Research & Development | Chemical & Microbial Analysis | Contamination Control | Production | Auditing | Specification Adherence | Root Cause Analysis | Inventory Control | Reporting & Documentation | Sales & Marketing | Operations Management | Leadership | Regulatory Compliance | Organizational Development

PROFESSIONAL EXPERIENCE

LECTURER – Kenya Medical Training College, Nyeri | 2016 – Present

- Prepare course outlines and learning materials within chemistry
- Help to provide an appropriate language learning environment for students
- Ensure suitable learning aids and resources are available to students

PLANT CHEMIST – Elgon Kenya Limited | 2015

- Performed and documented visual and dimensional inspection and physical testing of incoming and in-process components and finished products.
- Documented inspection issues and performed root cause analysis investigation to determine if it is operator or machine error, problem solving solutions to prevent further defects.
- Provided trouble-shooting and problem-solving input to the team for general production issues.
- Check for defects in the products manufactured, ensuring a high standard of quality control.
- Frequently conducted basic quality control tests.
- Pack all completed products to commercial standards.
- Ensured team adherence to quality specifications and quality checks.

GENERAL MANAGER – Mibbs Ventures | 2010 – 2014

- Provided quality control input and leadership into a wide range of special projects.
- Proactively problem solve and trouble shoot breakdowns as well as repair and upgrade / improve equipment.
- Ensured a high standard of final product quality.
- Followed and complied with all company health and safety standards.
- Developed and implemented strategic planning and quality control initiatives.
- Worked with laboratory staff to ensure the integrity of plant chemistry, product quality and effluent disposal.
- Ensured routine operations, duties and emergency system checks are completed and faults rectified.

ADDITIONAL EXPERIENCE

LECTURER – Kenya Medical Training College | 2007 – 2010

SALES EXECUTIVE – Lasap Kenya Limited | 2003 – 2005

TEACHER – St. Paul Minor Seminary | 1999 - 2002

EDUCATION

Bachelor of Science in Chemistry/Biochemistry – Egerton University | 1998

Certificate in Computer Packages – Plaza Training Institute | 2019

Kenya Certificate in Secondary Education – Endarasha Secondary School | 1991

Technical Proficiency
