## INFOS

- Available for relocation to the UAE.
- Passionate about mentoring and fostering team growth.
- Committed to continuous learning through technical research and collaboration.
- Expertise in crafting clean, maintainable, and scalable code.

## LANGUAGES

- French: Native
- English: Fluent
- Spanish: Fluent
- Arabic: Beginner

## PROFILE

The quality of integration and ongoing deployment processes, the technical level of the teams and the working atmosphere are key factors.

I'm committed to delivering quality work, but also to expanding and sharing my knowledge.

This dynamic is continually enriched through technical monitoring and constructive exchanges with my peers.

## TECHNICAL SKILLS

- Programming languages: **Java (7 to 21)**
- Backend/DevOps: **Spring Boot, REST APIs, Docker, Kubernetes**
- Frontend: **AngularJS, Angular, ReactJS, JSP, Struts**
- Databases: **PostgreSQL, Oracle, MySQL**
- Testing: **JUnit, Selenium WebDriver, TDD/BDD (Cucumber, Gherkin)**
- DevOps: **Docker, Kubernetes, RedHat OpenShift, CI/CD (Jenkins, GitLab)**
- Version Control: **Git, Bitbucket, Sourcetree**
- IDEs: **IntelliJ, Eclipse, VS Code**
- Methodologies: **Agile (SCRUM, Kanban), Pair Programming**

## EDUCATION

**Professional Certification in Java/JEE Development** 2015-2016  
AFPA - Paris, France

**Master's Degree in International Commerce**  
University of Cergy-Pontoise, France 2005-2006

# PROFESSIONAL EXPERIENCE

---

## Full-Stack Developer (retail sector)

**STIME** – Châtillon, France

November 2022 – December 2024 (2 YEARS AND 1 MONTH)

- Worked with a Product manager as a two-person team to maintain a website developed in **AngularJS** and used by the company's sales outlets to order products for the coming year's commercial operations.
- Implemented new functionalities, rewriting PDF generation method
- Developed a front-end in Angular 18 to generate email signatures
- Joined a newly created squad following the Shopify squad framework to develop web services plugged to Solace/MQ Series messaging and Managed File Transfer (MFT)
- Mentored junior developers and alternates

### Side achievements :

- Debugged an urgent **Keycloak** issue on a distinct project which was blocking the deployment of a new version in production
- Rewrote a front-end project developed in Vue.js to migrate to **Angular 18**
- Developed a proof of concept in **Angular 18** and **PrimeNG** components to convince top management to start a new project with a controlled budget: the result was met with high satisfaction leading to a management meeting to decide a new orientation

Technologies used : **Java (7, 8, 21), Angular (JS, 18), Spring boot, PostgreSQL, RedHat OpenShift, CI/CD Gitlab, Solace PubSub, Keycloak, Junit, Mockito**

## Full-Stack Developer (financial investment sector)

**B4Finance** – Paris, France

June 2022 – September 2022 (4 MONTHS)

- Enhanced a digital investment and KYC management platform.
- Implemented webservices in **REST**.
- Implemented SQL queries using **PostgreSQL**
- Developed web pages in **ReactJS**
- Automated regression testing using Selenium.

Technologies used : **Java 11, ReactJS, Spring boot, PostgreSQL**

## Full-Stack Developer (asset management sector)

**Harvest SA** – Les Lilas, France

September 2018 – May 2022 (3 YEARS AND 8 MONTHS)

- Developed web services in **SOAP** and **REST** with **Spring Boot** and **Java versions 8 and 11**
- Tested the web services with **SoapUI** and **Postman**
- Implemented **Oauth2 authentication** to allow clients to access services
- Wrote unit and integration tests (TDD method with **Cucumber/Gherkin**)
- Developed web pages with **Angular JS**, **Angular 7** and **Angular Material**
- **Jenkins** packaging of deliverables
- **XML** feed transformation via **XSL** sheets
- Authored technical documentation and tutorials on **Atlassian Confluence**
- Worked in pair programming and helped in the integration of new team members
- Communicated with customers via email and phone
- Participated and took the lead of DSTM, retrospectives, and **SCRUM** planning (Agile mode)
- Collected business requirements from the design phase (Agile 3 Amigos practice)

Technologies used : **Spring Boot**, **Java versions 8 and 11**, **SOAP** and **REST APIs**, **SoapUI**, **Postman**, **Jenkins**, **XML/XSL**, **Atlassian suite**, **SCRUM** practices

## Full-Stack Developer (IT services and consulting sector)

**Capgemini Technology Services** – Suresnes, France

September 2017 – April 2018 (8 MONTHS)

I worked on a contract basis for two Capgemini clients :

**ELIS** (French company and specialized in cleaning and hygiene) :

- Writing automation and non-regression tests.
- Assigning incident tickets and fixing bugs.
- Double-checking corrections and performing code reviews.
- Committing and merging changes via Bitbucket.

Technologies used : **Swagger**, **Postman**, **AngularJS**, **Selenium WebDriver**, **JUnit**, **Bitbucket**, **SourceTree**, **Jira**, **Jenkins**, **Apache Maven**.

**EUROPCAR** (French car rental company) :

- Correcting and automating unit tests.
- Committing and merging changes via **SVN**.
- Developing graphical charts using **AngularJS**, **ChartJS** and **JQuery**.
- Integrating live data streams for dynamic display (**JSON**, **CSV**).

Technologies used : **SVN**, **AngularJS**, **ChartJS**, **JQuery**, **JUnit**, **Jenkins**, **Apache Maven**.
