Summary 7+ years of experience as an **iOS developer**, specialized in designing and developing applications and frameworks for the iOS platform using Xcode. Proficient in creating intuitive user interfaces and ensuring seamless user experiences. Additionally, gained 1+ year of experience with **React Native** for **cross-platform** development.

TECHNICAL SKILLS

Category	Skills/Technologies
Programming Languages & Frameworks	Swift, SwiftUI, Objective-C, RxSwift, React Native
Networking & APIs	URLSession, Alamofire, Familiarity with RESTful APIs and Web
Layout & Design	Auto Layout, Adaptive Layout, Accessibility, Solid understanding of mobile UX/UI principles and best practices
Architectures	MVC, MVVM, SOLID Principles
Databases	Core Data, Realm
iOS Frameworks	UIKit, Core Data, Core Animation, Core Graphics, Core Text, AVFoundation, Autolayout, Size Classes, SnapKit, Extensions, iOS SDK
Maps & Location Services	MapKit (Apple Maps), Google Maps
Notifications	Push Notifications, Firebase (Push Notifications)
Testing	Unit Testing, UI Testing
Tools & Libraries	CocoaPods, Swift Package Manager (SPM), JWT Tokens, Git, Third Party libraries.
App Deployment	Apple Provisioning Profiles, Uploading apps to the App Store
Monitoring & Analytics	Firebase, Sentry
Cloud Services	AWS, Azure, Google Cloud (Experience with cloud-based infrastructure, storage, and APIs)
Payment Gateways	Integration with various payment platforms
Cryptography	Secure Data Encryption, Key Management, JWT Tokens
Mobile Security	Secure Coding Practices, Data Protection, Nexus, Mobile app security best practices
CI/CD Pipelines	Experience with continuous integration and continuous deployment (CI/CD) pipelines for iOS applications

Category	Skills/Technologies
Proven Experience	Developed and launched iOS applications across diverse domains, including fintech, restaurant management, banking, e-commerce, school tiffin systems, and ride booking apps. Delivered custom solutions tailored to specific business needs across various industries.
Agile Methodology	Experience in Agile development environments

Professional Experience

Capgemini

December 2021 - December 2024

Subway App :

- ☐ The Subway app makes ordering your favourite sandwiches easy and convenient.

Customise your subs, access exclusive deals, find the nearest locations, and quickly reorder your go-to meals—all from your mobile app.

Roles and Responsibilities:

- Developed the Subway App, enhancing the user experience for food ordering and delivery.
- Designed the layout for combo products and implemented the API for combo product offers.
- Collaborated with the team to integrate the payment section and ensure smooth, secure transactions.
- Developed the app using Swift , RXSwift and SwiftUI.

App Store Link : - <https://apps.apple.com/us/app/subway/id901941015>

Syngenta :

- ☐ The Cropwise™ Financials iOS app showcases advanced technology that supports decision-making throughout the farming season by providing users with:
 - Farm Input Tracking: Track inputs by organization, farm, field, or crop zone.

- Task and Yield Management: Record and manage application tasks, recommendations, and yield records effectively.
- Advisor Recommendations: Quickly capture and convert recommendations shared by trusted advisors.
- Weather and Market Monitoring: Monitor weather conditions and commodity prices to stay informed and make timely decisions.

Roles and Responsibilities:

- Created adaptive layouts to meet specific requirements and optimize usability across devices.
- Added accessibility features to ensure the app is inclusive and usable for all users.
- Conducted bug fixes and resolved issues logged in JIRA.
- Implement new features and improve the user experience.
- Performed requirements gathering, feasibility analysis, and wrote efficient, maintainable code.
- Conducted PR reviews to maintain code quality and consistency
- Developed the app using Swift and SwiftUI.

App Store Link : - <https://apps.apple.com/us/app/cropwise-financials/id1574392332>

McDonalds App :

- ❑ The McDonald's GMA is a global food delivery application for McDonald's restaurants. It allows registered users to find nearby restaurants based on their location, search for food, and place orders for home delivery or take-away. Users can also enjoy loyalty rewards and discount benefits based on the latest updates.

Roles and Responsibilities:

- Collaborated with the team to integrate new features and ensure seamless functionality.
- Conducted PR reviews to maintain code quality and consistency.
- Worked on localization to support multiple languages and maintained build configurations.
- Designed and implemented APIs for the loyalty and rewards section, ensuring a user-friendly experience.
- Developed the app using Swift and SwiftUI.
