## ABOUT ME

---

- **Software Developer** specializing in both front end and back-end development. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, JavaScript, CSS, React.JS, Bootstrap, MUI. Strong background in developing websites.
- Proficient in back-end technologies including Node.JS, SQL, Python, and MongoDB. I have a comprehensive understanding of server-side development, database management, and API integration.
- Focused and enthusiastic developer with a keen interest in web development and software development. By comprehensive exposure to the underlying concepts and applying them vividly to various projects, my love for these domains came into being. I am a passionate individual who thrives to build and apply algorithms to solve real-world industry problems.
- I am a dedicated Node.js developer with a passion for creating efficient and back-end solutions. With a strong foundation in Node.JS event-driven architecture and non-blocking I/O, I excel at transforming design concepts into seamless server-side applications.
- My proficiency in modern JavaScript, responsive design, and collaboration with cross-functional teams allows me to deliver high-quality solutions that meet both user and business needs. Constantly staying abreast of industry trends, I am committed to enhancing my skills and contributing to innovative and impactful projects. Let's build exceptional user experiences together.
- I have successfully developed several projects using Node.JS and Python, showcasing my proficiency in crafting modern and performative web applications. My hands-on experience with these technologies reflects my commitment to continuous improvement and the delivery of solutions that meet the highest standards.
