(specialize: safety engineering, maintenance engineering, project management and strategic management)  
Dedan Kimathi University of Technology, 2012 to-date.
- ✓ **Bachelor's of science degree in Manufacturing engineering** Kenyatta University, 2009

**Technical director  
Liquidity Limited, Kenya**

**2019 - present**

The company started as an energy storage research organization. As one of the founders, I embarked on setting systems from scratch in engineering designs, workshop processes, inventory operations, simulations up to testing phases. Its expansion has widened my scope of work to consultancy services, projects management, running safety programs and contracts management .

**Instructor**

**2017- 2018**

**Kisii polytechnic, Kenya**

Trained and guided diploma and certificate students learning engineering courses. Developed and implemented training plans, setting of evaluations, marking exams and practical demonstration that achieved 100% pass rate.

**Executive Chairman**

**2013 - 2016**

**Arise youth Group, Kenya**

**Spear headed** operations reviews and implemented innovative systems that lead to assets growth by 120 times within 3.5 years. Oversaw formulation of investment assessment criteria that minimised risks.

**Engineer**

**2010 - 2011**

**Craftskills Wind Energy International, Kenya**

Participated in design, workshop and equipments servicing and ensured over 98% equipment availability. Achieved zero accidents by promoting a proactive safety practice in inventory, workshop, material transportation and on site during assembly, installation and testing.
